Professional Summary

Product Designer with **4+ years** of experience designing complex **SaaS platforms, AI-powered applications, ERP systems, and enterprise workflow products**. Experienced in owning product design from discovery to delivery, including user research, competitive analysis, requirements gathering, UX architecture, feature planning, interactive prototyping, stakeholder collaboration, developer handoff, and design QA/UAT.

With a strong **Computer Science** background, I work closely with product teams, engineers, and international clients across the **US, Europe, and Asia** to turn complex business requirements into intuitive, scalable digital products. Passionate about simplifying complex workflows, solving real user problems, and creating design systems that improve usability, efficiency, and product adoption.

Experience

Zaag Systems Ltd - User Experience Designer

September 2022 – Present

- Designed and delivered **multiple SaaS, AI, ERP, and enterprise** software products used across **healthcare, restaurant operations, legal communities, and corporate workflow automation**.
- Worked directly with international clients, project managers, developers, and stakeholders throughout the product lifecycle.
- Led product discovery activities including competitive analysis, requirement gathering, user journey mapping, and feature planning.
- Conducted design reviews, usability validation, and design QA to ensure implementation quality and product consistency.
- Collaborated closely with engineering teams to improve workflows, reduce complexity, and optimize user experiences for large-scale systems.

Doptor Ltd - Jr. UI/UX Designer

2022 (4-Month Internship)

- Assisted in designing web and dashboard interfaces for internal and client projects.
 - Collaborated with senior designers and developers to improve usability and implementation quality.
 - Collaborated in design research and interface design activities.
-

Key Projects

Toppan - Enterprise Billing Automation Platform | [Design Case Study Link](#)

Japan's Largest Printing Company | Internal Enterprise Platform | 3,500+ Internal Users

- Designed AI-assisted **billing automation, intelligent email categorization, dynamic approval workflows, role management systems, activity tracking, and enterprise reporting** experiences.
- Led stakeholder discussions, requirement validation, prototype presentations, and weekly design reviews across **three delivery phases over a span of 1 year**.

- **Scale:** Designed for **3,500+** internal users managing **500,000+** jobs and **5 million+** tasks across enterprise printing operations, requiring information architecture and workflows capable of handling large volumes of operational data efficiently.
- Worked directly with project managers, system administrators, and business stakeholders throughout discovery, validation, and delivery phases.

OS Pharmacy - Pharmacy Management System (SaaS) | [Live Product](#)

Mobile | Web | Desktop | Used by 200+ Pharmacy in Bangladesh

- Designed and evolved a multi-platform pharmacy management SaaS serving **200+** pharmacy users, spanning **web, desktop, and mobile** applications.
- Led a major product redesign based on customer feedback, feature requests, observed workflow issues, and evolving business requirements.
- Redesigned and expanded core workflows **including sales, purchases, inventory, low-stock alerts, expired products, returns, due collection, requisitions, and subscriptions.**
- Expanded the product with new Clinic & doctors support and Accounting capabilities, including ledger, financial tracking, and **40+ Reports** data & analytics based on research & user feedbacks.
- Designed an **offline-first mobile & desktop** application that synchronizes with the web system when connectivity is restored.
- Built and maintained a **scalable design system with reusable components, patterns, styles, and states** across the product ecosystem.
- Worked closely with customers, product stakeholders, and engineers to continuously identify problems, prioritize improvements, and translate real-world pharmacy operations into usable product experiences.

ZaagAI - AI Business Solution (SaaS) | [Live Product](#)

- Led product design for the company's first AI SaaS platform.
- Designed **AI chatbot management, RAG knowledge bases, lead capture, booking systems, human-agent handoff, web integrations, and omnichannel communication** experiences.
- Conducted local and international competitor research to shape product strategy and user experience.

Kabab King - Restaurant Management System

USA | Internal Enterprise Platform | Mobile | Web | POS | Multiple Branch across New York with Franchising

- Designed an end-to-end restaurant management ecosystem for Kabab King, a New York-based restaurant, covering **POS, Kitchen Display System, Waiter Mobile App, POS Mobile App, Online Ordering Website, and Admin Platform.**
- Designed complex restaurant workflows including **inventory, sales, orders, menu management, low-stock alerts, catering, combo meals, online ordering,** and restaurant administration.
- Designed role-based experiences for administrators, managers, waiters, kitchen staff, and other operational users.
- Worked directly with the client/end users and project manager throughout the design process, participating in daily meetings to understand requirements, clarify workflows, and resolve design questions.

- Collaborated closely with developers to ensure the designs were technically feasible, consistent, and accurately implemented across the product ecosystem.

Apex Footwear – Enterprise CMS & Admin Panel | [Live Product](#)

Bangladesh's Leading Footwear Brand

- Contributed to the design of the internal CMS and administration platform used to manage website content, products, banners, promotional campaigns, and other digital assets.
- Designed role-based dashboards and content management workflows focused on improving efficiency for internal content teams.
- Collaborated with developers and stakeholders while mentoring and providing design guidance to a fellow designer throughout the project.

Skills & Tools

Core Skills: UX Research, Product Discovery, Requirements Gathering, Feature Planning, Competitive Analysis, User Flows, Information Architecture, Design Systems, Interactive Prototyping, Usability Testing, Accessibility, Stakeholder Communication, Client Workshops, Developer Collaboration, Developer Handoff, Design QA & UAT Validation

Tools: Figma, FigJam, Miro, Notion, Jira, Claude Design, Open Design

AI & Workflow: Figma Make, Figma MCP with Claude Code/Codex/OpenCode for AI-Assisted Interactive Prototyping and workflow design

Languages: English (Fluent), Bangla (Native)

Education

Master of Science (M.Sc.) in Computer Science

American International University-Bangladesh (AIUB)

2023 – 2024

Bachelor of Science (B.Sc.) in Computer Science

American International University-Bangladesh (AIUB)

2018 – 2021
