Professional Summary

Product Designer with **4+ years** of experience designing **SaaS, AI, ERP, and enterprise products**. Experienced in taking complex products from discovery and requirements gathering through **UX architecture, prototyping, stakeholder collaboration, developer handoff, and design QA/UAT**. With a **Computer Science background**, I work closely with **international clients** and engineering teams to simplify complex workflows and build scalable, user-focused digital products.

Experience

Zaag Systems Ltd - User Experience Designer

September 2022 – Present

- Own end-to-end product design across **SaaS, AI, ERP, and enterprise products**, from discovery and requirements gathering to implementation and validation.
- Work directly with **international clients, product stakeholders, project managers, and engineers** to translate complex business requirements into intuitive product experiences.
- Lead **UX architecture, user flows, information architecture, feature planning, prototyping, and design systems** for complex products.
- Partner with engineering throughout implementation, including **developer handoff, design QA, UAT, and usability validation**.
- Present designs to clients and stakeholders, facilitate feedback, and iterate solutions based on business and user needs.

Doptor Ltd - Jr. UI/UX Designer

2022 (4-Month Internship)

- Designed web and dashboard interfaces while collaborating with senior designers and developers.
 - Contributed to research, wireframing, UI design, prototyping, and usability improvements.
-

Key Projects

Toppan - Enterprise Billing Automation Platform | [Design Case Study Link](#)

Japan's Largest Printing Company | Enterprise | 3,500+ System Users | 5M+ tasks | 500K+ jobs

- Led UX design across **three delivery phases over 1 year**, transforming complex email analysis, billing, approval, project, and job-management workflows into an AI-assisted enterprise platform.
- Worked directly with **system administrators, PMs, and business stakeholders** through requirements, prototyping, validation, and implementation.
- Designed scalable workflows for **AI email categorization, billing automation, dynamic approvals, role-based access, activity tracking, and enterprise reporting**.

OS Pharmacy - Pharmacy Management System (SaaS) | [Live Product](#)

Bangladesh | Web + Desktop + Mobile | 200+ Pharmacy Users

- Led the redesign and continuous evolution of a multi-platform pharmacy SaaS based on **customer feedback, workflow issues, and feature requests**.
- Designed core pharmacy operations including **sales, purchases, inventory, expiry, return, due, requisitions, subscriptions, accounting, ledger, income/expense, and 40+ reports/analytics**.

- Designed **offline-first desktop/mobile experiences with online synchronization** and a scalable design system used across the ecosystem.

ZaagAI - AI Business Solution (SaaS) | [Live Product](#)

Global | AI | SaaS

- Led product design for AI SaaS platform and designed experiences for **AI chatbot management, RAG knowledge bases, lead capture, booking, human-agent handoff, web integrations, and omnichannel communication.**
- Conducted local and international competitor research to inform product strategy and UX decisions.
- Collaborated with developers to ensure technical feasibility and accurate implementation.

Kabab King - Restaurant Management System

New York, USA | POS + Web + Mobile | Enterprise | Multi-Branch with Franchise

- Designed an end-to-end restaurant ecosystem covering **POS, Kitchen Display, Waiter App, POS Mobile, Online Ordering, and Admin.**
- Designed workflows for **inventory, sales, menu management, catering, combo meals, low stock, franchising, and role-based operations.**
- Worked directly with the client, end users, and project manager through **weekly meetings, design presentations, requirement clarification, and feedback cycles.**

 Apex Footwear – Enterprise CMS & Admin Platform | [Live Product](#)

Bangladesh's Leading Footwear Brand | Enterprise | CMS

- Designed internal CMS and admin experiences for managing products, website content, banners, campaigns, and digital assets.
- Designed role-based dashboards and workflows to improve efficiency for internal content teams.
- Collaborated with stakeholders and developers while providing design guidance to another designer.

Skills & Expertise

Product Design: Product Discovery · UX Research · Information Architecture · User Flows · Interaction Design · Prototyping · Design Systems · Usability Testing · Accessibility · Design QA · UAT

Collaboration: Requirements Gathering · Stakeholder Management · Client Workshops · Design Presentations · Developer Collaboration · Agile Product Development

AI / Technical: Figma Make · Figma MCP · Claude Code · Codex · OpenCode · Frontend Prototyping · HTML/CSS · React/Next.js · Tailwind · shadcn/ui · Ant Design

Tools: Figma · FigJam · Miro · Notion · Jira

Languages: English (Fluent), Bangla (Native)

Education

M.Sc. Computer Science

American International University-Bangladesh

2023 – 2024

B.Sc. Computer Science

American International University-Bangladesh (AIUB)

2018 – 2021
